

Green Building for the Building Professional

Tuesday & Wednesday
September 7 & 8, 2010

8:00 am - 5:00 pm
University Plaza
St. George, Utah

**Become a
Certified
Green
Professional!**

Implementing cost-effective green building into your construction practices begins with up-front planning that examines the whole house and the building science behind it. In this two-day course, you will learn how to apply the ANSI-approved National Green Building Standard™ in the construction of a new home, remodel, site development or multifamily project. With a focus on flexibility and a sound knowledge base, the course provides the tools for a successful green project.

As a graduate of this course, you will learn:

- How to integrate sound building science principles into design decisions and the materials selection process.
- How to incorporate the ANSI-approved National Green Building Standard.
- How to examine specific best green building practices in each chapter of the National Green Building Standard.
- How to evaluate and sell in the growing green marketplace.

Utah Contractor Continuing Education Credits: 3 Core and 3 Professional
